

Azure Case Study

HESA Enterprises

HESA aims at connecting Bharat with India and India with Bharat Phygitally and bridging the gap for the world's largest customer base that resides in rural India. Leveraging technology and people strength is what makes us tick. Our platform connects both the ends and enables buying and selling with an almost 'doorstep access'.

WHAT WE OFFER

The HESA infrastructure was in onPrem and we have Migrated the services to Azure with the set of services like App Service Server, Database, and Storage

We have helped the HESA team for implementing the services with on Azure on Azure App Service and SQL Server DB

Customer was satisfied with all our support and assistance during the migration where we have assisted the Paymate team for Migrating services from Onprem to Azure

The main Feature are:

1. Automation features will be a boon for you when you get to know more about Azure
2. scalability and reliability features are controlled by Microsoft Azure

WHAT OUR CUSTOMERS ARE SAYING

"Thank you so much for setting up the servers as per our requirements. Your attention to detail is really appreciated and acknowledged"

– Ramesh, IT Head from HESA Enterprises

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS
Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE
Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC
Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

MOBILE
Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

MEDIA
Create, manage, and distribute media in the cloud – everything from encoding to content protection

WHY AZURE

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
