

Azure Case Study

Triquetra

Triquetra is an Artificial Intelligence (AI) based Health tech Start-up focused on assisting Medical Practitioner in providing quality healthcare using the power of futuristic technology.

WHAT WE OFFER

The Triquetra infrastructure, we have migrated the services to CSP Subscription and redeployed the AKS on Azure under G7CR Technologies Pvt Ltd.

We have helped Triquetra for migrating the services with the best approach and lesser downtime. We also redeployed the AKS as per the requirement.

Customer was satisfied with all our support and assistance during the migration where we have assisted the Triquetra team for Migrating services to CSP Subscription on Azure.

The main features are:

- Surface information that is valuable to the organization.
- Gives knowledge on valued products or services
- Scalability and reliability features are controlled by Microsoft azure.

WHAT OUR CUSTOMERS ARE SAYING

"Great job all of you... thanks for all the effort."

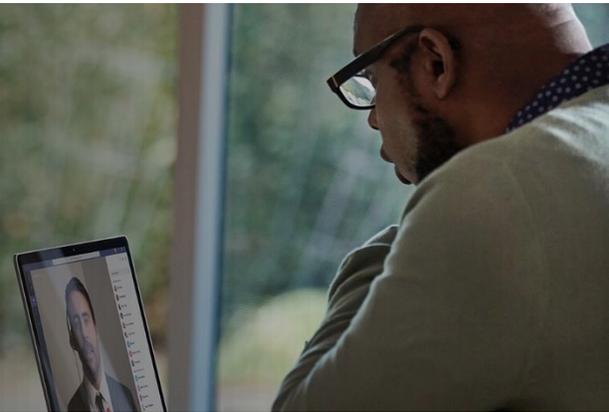

– Solomon, CEO Of Triquetra

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection

WHY AZURE

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
