

# Birlasoft Case Study

DC Transformation: Birlasoft had 3 datacenter in India supporting the hosting requirements of the organization. The DCs were due for a refresh, and Birlasoft carried out a 6-month long extensive evaluation and decided to migrate to Cloud to support their growing business requirements.

6 Months

## CUSTOMER PROBLEM

DC refresh, intent to move to OPEX model, leveraging PAYG model to support growing business requirements & new projects.

## SOLUTION OFFERED

Migrating to Microsoft Azure & Modernizing applications hosted on Springboot to run on Azure Kubernetes services.

## CUSTOMER ADOPTION JOURNEY

### SOLUTION ASSESSMENT

G7 CR Carried out assessment, building solution design on Azure, detailed architecture and TCO for the System

### DEPLOY

G7 CR implemented the landing zone on Azure, Automated deployments on Azure, Data migration, Modernization of Apps & DBs, DR setup, Security assessment.

### ENHANCE

Continue to improve security posture, phased migration of technology investments in licenses to flexible PAYG Model.

## CUSTOMER VALUE

Customer was able to forego CAPEX requirement, leverage pay as you use model, take on new projects & provision services faster.
