

SmartKargo Case Study

Tenant consolidation and migration from one subscription to another azure subscription

SmartKargo at a glance

SmartKargo puts the airline at the core of the cargo supply chain, and provides everything airlines need, "out of the box." A rich set of features supports key functions: bookings, capacity, pricing, schedules, operations, and complete cargo revenue accounting. The solution comes with a powerful, built-in data visualization platform, and real-time track and trace. It is the most complete cargo package available today.

Key Highlights & Success Factors

Successful consolidation of across tenant workloads in Azure

CHALLENGES

Tenant consolidation was a challenge for SmartKargo since it was operating under two tenants with various of its clients residing under those two tenants. First tenant was hosting the DevTest environments of the SK's clients, whereas the second was hosting the production environments of the same. The selective clients of SmartKargo needed to be migrated to a new office 365 tenant.

SOLUTIONS

G7 CR recommended the below approach for migration:

Oman DevTest

Phase 0 - Understanding the requirement

Phase 1 - Detailed Assessment

Phase 2 - Implementation Plan

Phase 3 - Tasks and ownership

Phase 4 - Validation and Testing

Norwegian DevTest

Phase 0 - Understanding the requirement

Phase 1 - Detailed Assessment

Phase 2 - Implementation Plan

Phase 3 - Tasks and ownership

Phase 4 - Validation and Testing

OUTCOME

G7 CR helped SmarKargo consolidating two tenants by following a detailed assessment, implementation and testing plan and delivered the project on time.
