

Azure Case Study

Inspire Labs (GrabOn)

GrabOn has helped Indian shoppers save huge on their online shopping expenses. GrabOn offers the best deals and the biggest discounts across a wide variety of categories, from food to fashion, footwear, electronics and gadgets, recharge, bill payment, and more. Associated with over 3000 merchants and offering 4000+ handpicked deals along with over a billion coupon redemptions, GrabOn has one clear objective - Helping you Save On Everything!. InspireLabs is migrated from AWS to Azure environment migration to Azure for better management of resources and cost optimization.

WHAT WE OFFER

The InspireLabs infrastructure was in AWS between multiple accounts and VPC and the customer wanted to modernize the environment and migrate it to Azure based on the requirement we have proposed the architecture and Migrated the services to Azure with the set of services like Windows Server with web application, SQL Database machines, storage and Azure CDN.

We have helped InspireLabs for migrating the services with the below approach

- 1.ASR:** To replicate the Server instance by native ASR to bring it on Azure by assessing the SQL machines and the Application servers
- 2.Online Migration:** To Rehost and complete modernize and Rearchitect the InspireLabs Azure Environment
- 3.Data Factory:** To migrate S3 buckets from the AWS to Azure storage account

The customer was satisfied with all our support and assistance during the migration where we have completed the Migrating services from AWS to Azure

The main Feature are:
1.Automation features will be a boon for you when you get to know more about Azure
2.scalability and reliability features are controlled by Microsoft Azure

WHAT OUR CUSTOMERS ARE SAYING

I appreciate and am very thankful for the amazing support you gave us during the server migrations from AWS to Azure.

— Anil Karri, from InspireLabs

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection

WHY AZURE

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
